Study guide

Working method: using this book	S2
Starting the voyage – Basic devices and tools	S3
Calculating and communicating	S4
The voyage – It's all about control	S5
First landfall – consolidation time	S6

Section 1 Hardware and software

What is a computer?	4
Main components or parts of a computer	4
The main hardware components of a computer	4
The main categories of software	5
How the hardware and software work together	6
A definition of a computer	8
In conclusion	9
Working with modern software	11
The Graphics User Interface - GUI	11
Some windows terminology	12
Mouse and keyboard operations	15
Standard Windows controls	15
Fundamentals of filing	19
Introduction	19
Where files are stored	19
More about file storage	21
Manipulating files and folders	23
Input and output	26
Introduction	26
The keyboard	26
The mighty mouse	28
Scanners	30
Digital cameras	31
Printers	33
Monitors	36
Specialised forms of input	41
Introduction	41
Other pointing devices	43
Voice recognition	44
Other devices	44
Ergonomics	45

Memory and storage	48
Introduction	48
Memory versus storage	48
RAM and ROM	50
Storage	53
Categories of software	62
Application software	62
System software	67
Installing and uninstalling	73
Operating systems	78
Why do we have operating systems?	78
Common operating systems	79
Functions of operating systems	80
Open source software versus proprietary software	83
Inside the computer case	88
Power supply	88
Hard drive	89
CD / DVD	89
CPU	89
CPU fan	89
Video card	90
Motherboard	90
Cables	91
Slots	91
DIMM slots / Memory	91
Types of computers	93
The common PC	93
The PDA / Smartphone	94
The laptop	95
The server	96
Supercomputers	97
Conclusion	97
Good housekeeping	99
Where the mess starts... ..	99
Developing good working habits	99
Software to help you maintain you computer	100
A good maintenance schedule	105
More about disk fragmentation	106
Section 2: E-communications	110
Introduction to networks and the Internet.....	112
Basic concepts and definitions	112
What is the Internet?	113
Why the Internet is so popular	113
What is needed to connect to Internet	116
How the Internet works	118

Finding information on the WWW	123
World Wide Web	123
Accessing web pages via Internet Explorer	124
Using search engines	125
Saving and printing web pages or pictures	130
Acknowledging your sources	131
Communicating via e-mail	133
How e-mail works	133
Web-based vs ISP-based e-mail	134
Practical e-mail	135
Ethical, safety and other issues when using the Internet	140
Spam, hoaxes and phishing	140
Spyware and Cookies	142
Viruses	144
Netiquette	145
User-access issues	146
 Section 3: The impact of computers	 150
New computer developments	152
introduction	152
Modern trends	154
Responsible use of technology	158
Why we use computers	162
Introduction	162
Speed and accuracy	163
Versatility	163
Reduced costs	164
Access to and processing of large quantities of data	164
Communication	164
Safety first!	165
 Section 4: Designing solutions	 168
Introduction to problem solving and algorithms	170
Introduction	170
What is an algorithm?	170
Specifying algorithms for computers	172
The Input-Process-Output (IPO) model	173
Decision making	177
How computers make decisions	177
Operators	177
Describing a decision	178
Using Boolean operators	182

Designing user-interfaces	186
Introduction	186
Appearance	186
Order and placing of components	187
Simplicity of design	188
Comprehensibility	189
 Section 5: Spreadsheets	 192
Creating and editing a spreadsheet	194
Basic knowledge and skills	195
Typing in data	200
Basic calculations	204
Functions	204
Formulas	209
Charts	214
Types of charts	214
Introduction	214
Chart terminology	216
Creating charts	216
Print and copy charts	220
Using a spreadsheet for problem solving	223
Functions that can help with the solution of problems	223
Nested IF functions	229
Steps in problem solving	231
 Section 6: Databases	 236
Introduction to Access	238
What is a database?	238
First encounter with Access	239
More about tables	243
Creating a table	245
Queries and reports	253
Introduction	253
Formulation of simple criteria	253
Enquiries with a Filter	255
Enquiries using Access queries	257
Reports	265
Designing a database	281
Planning the database table	281
Forms	285
Photographs as fields in a database	292
