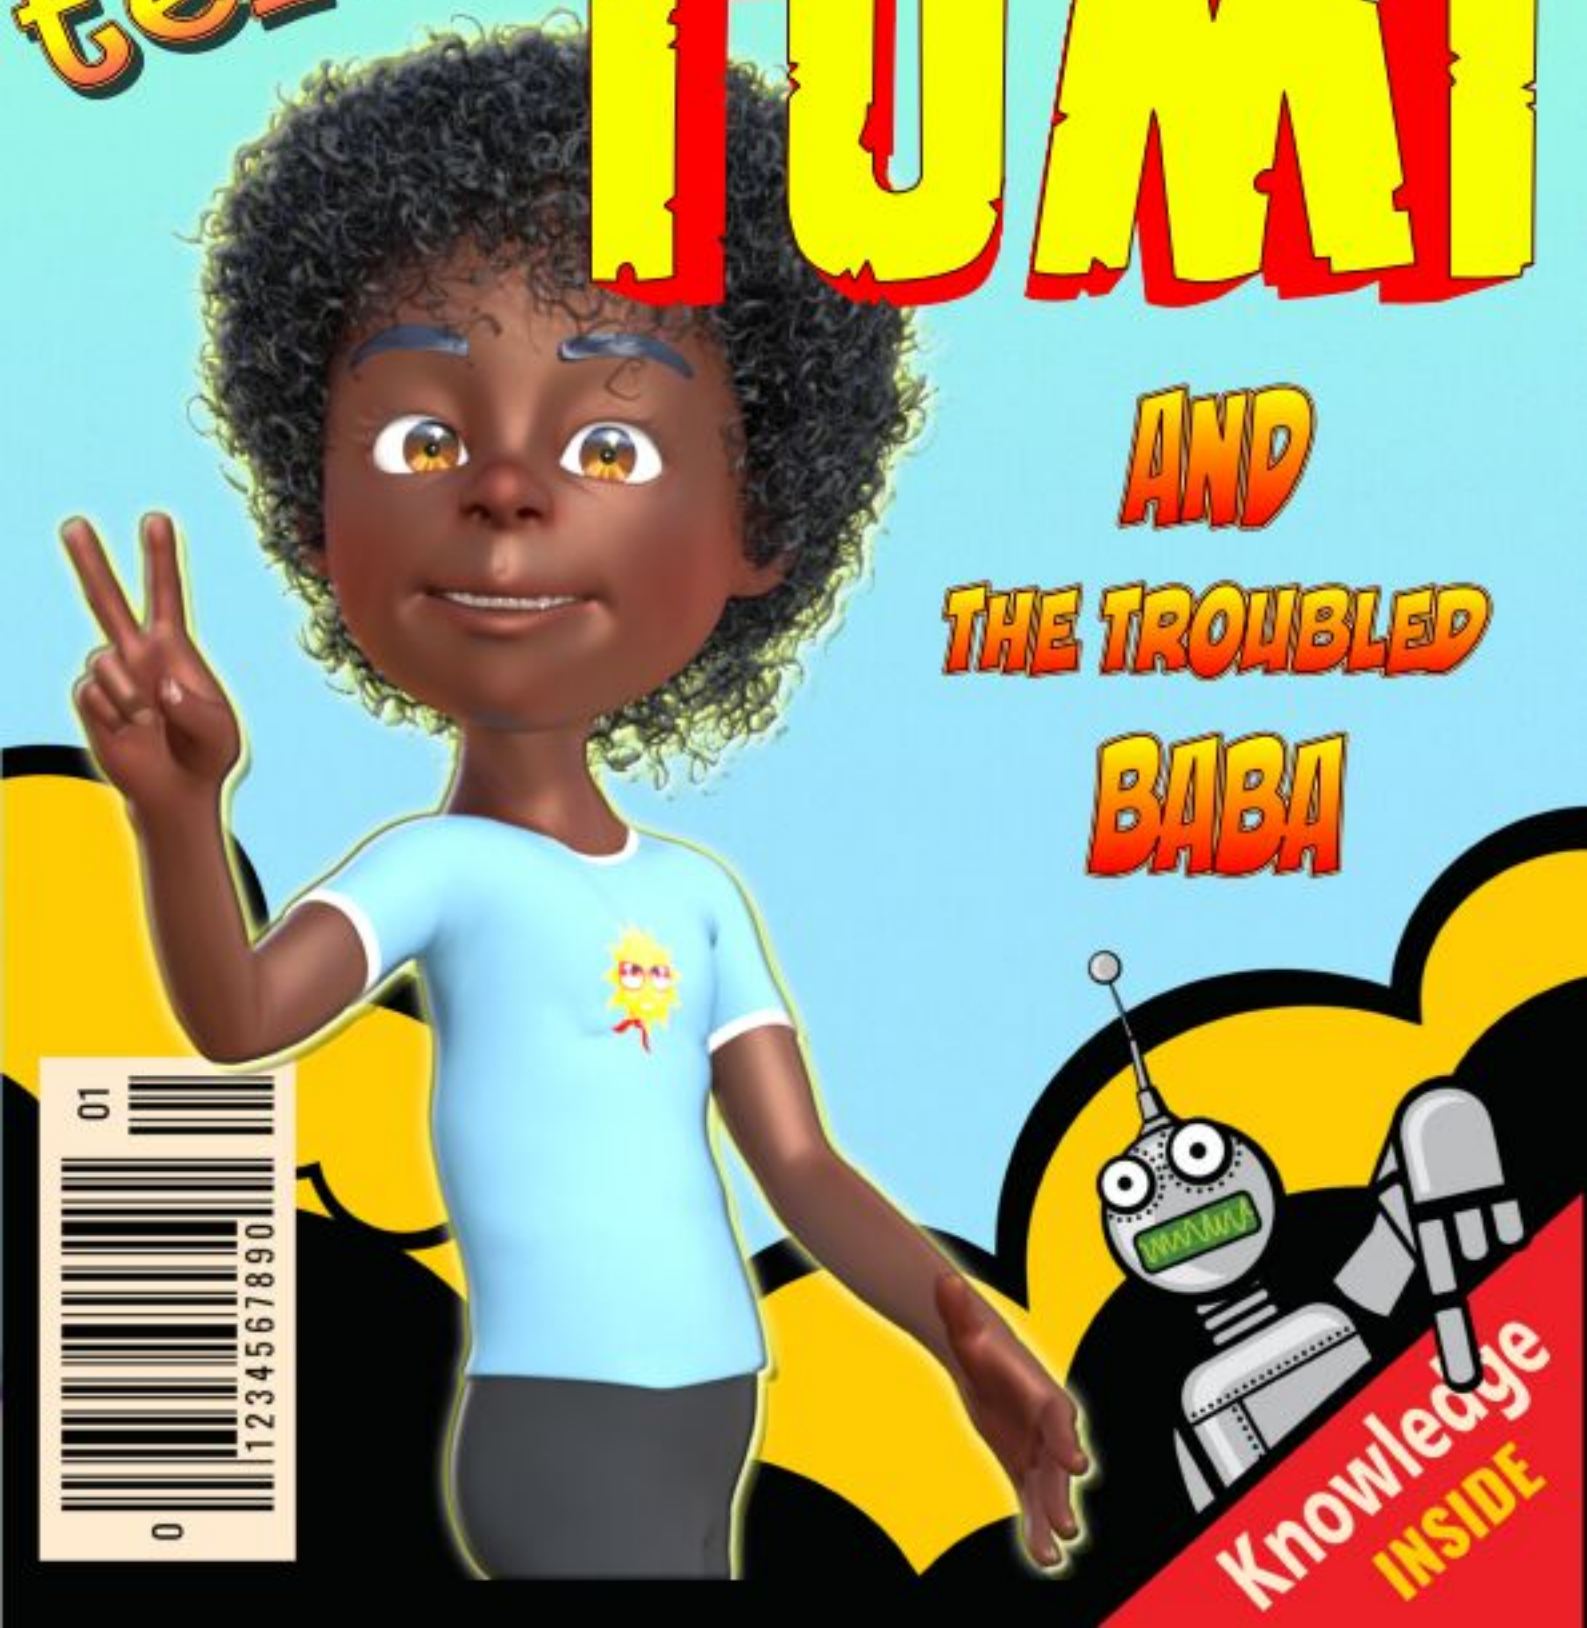
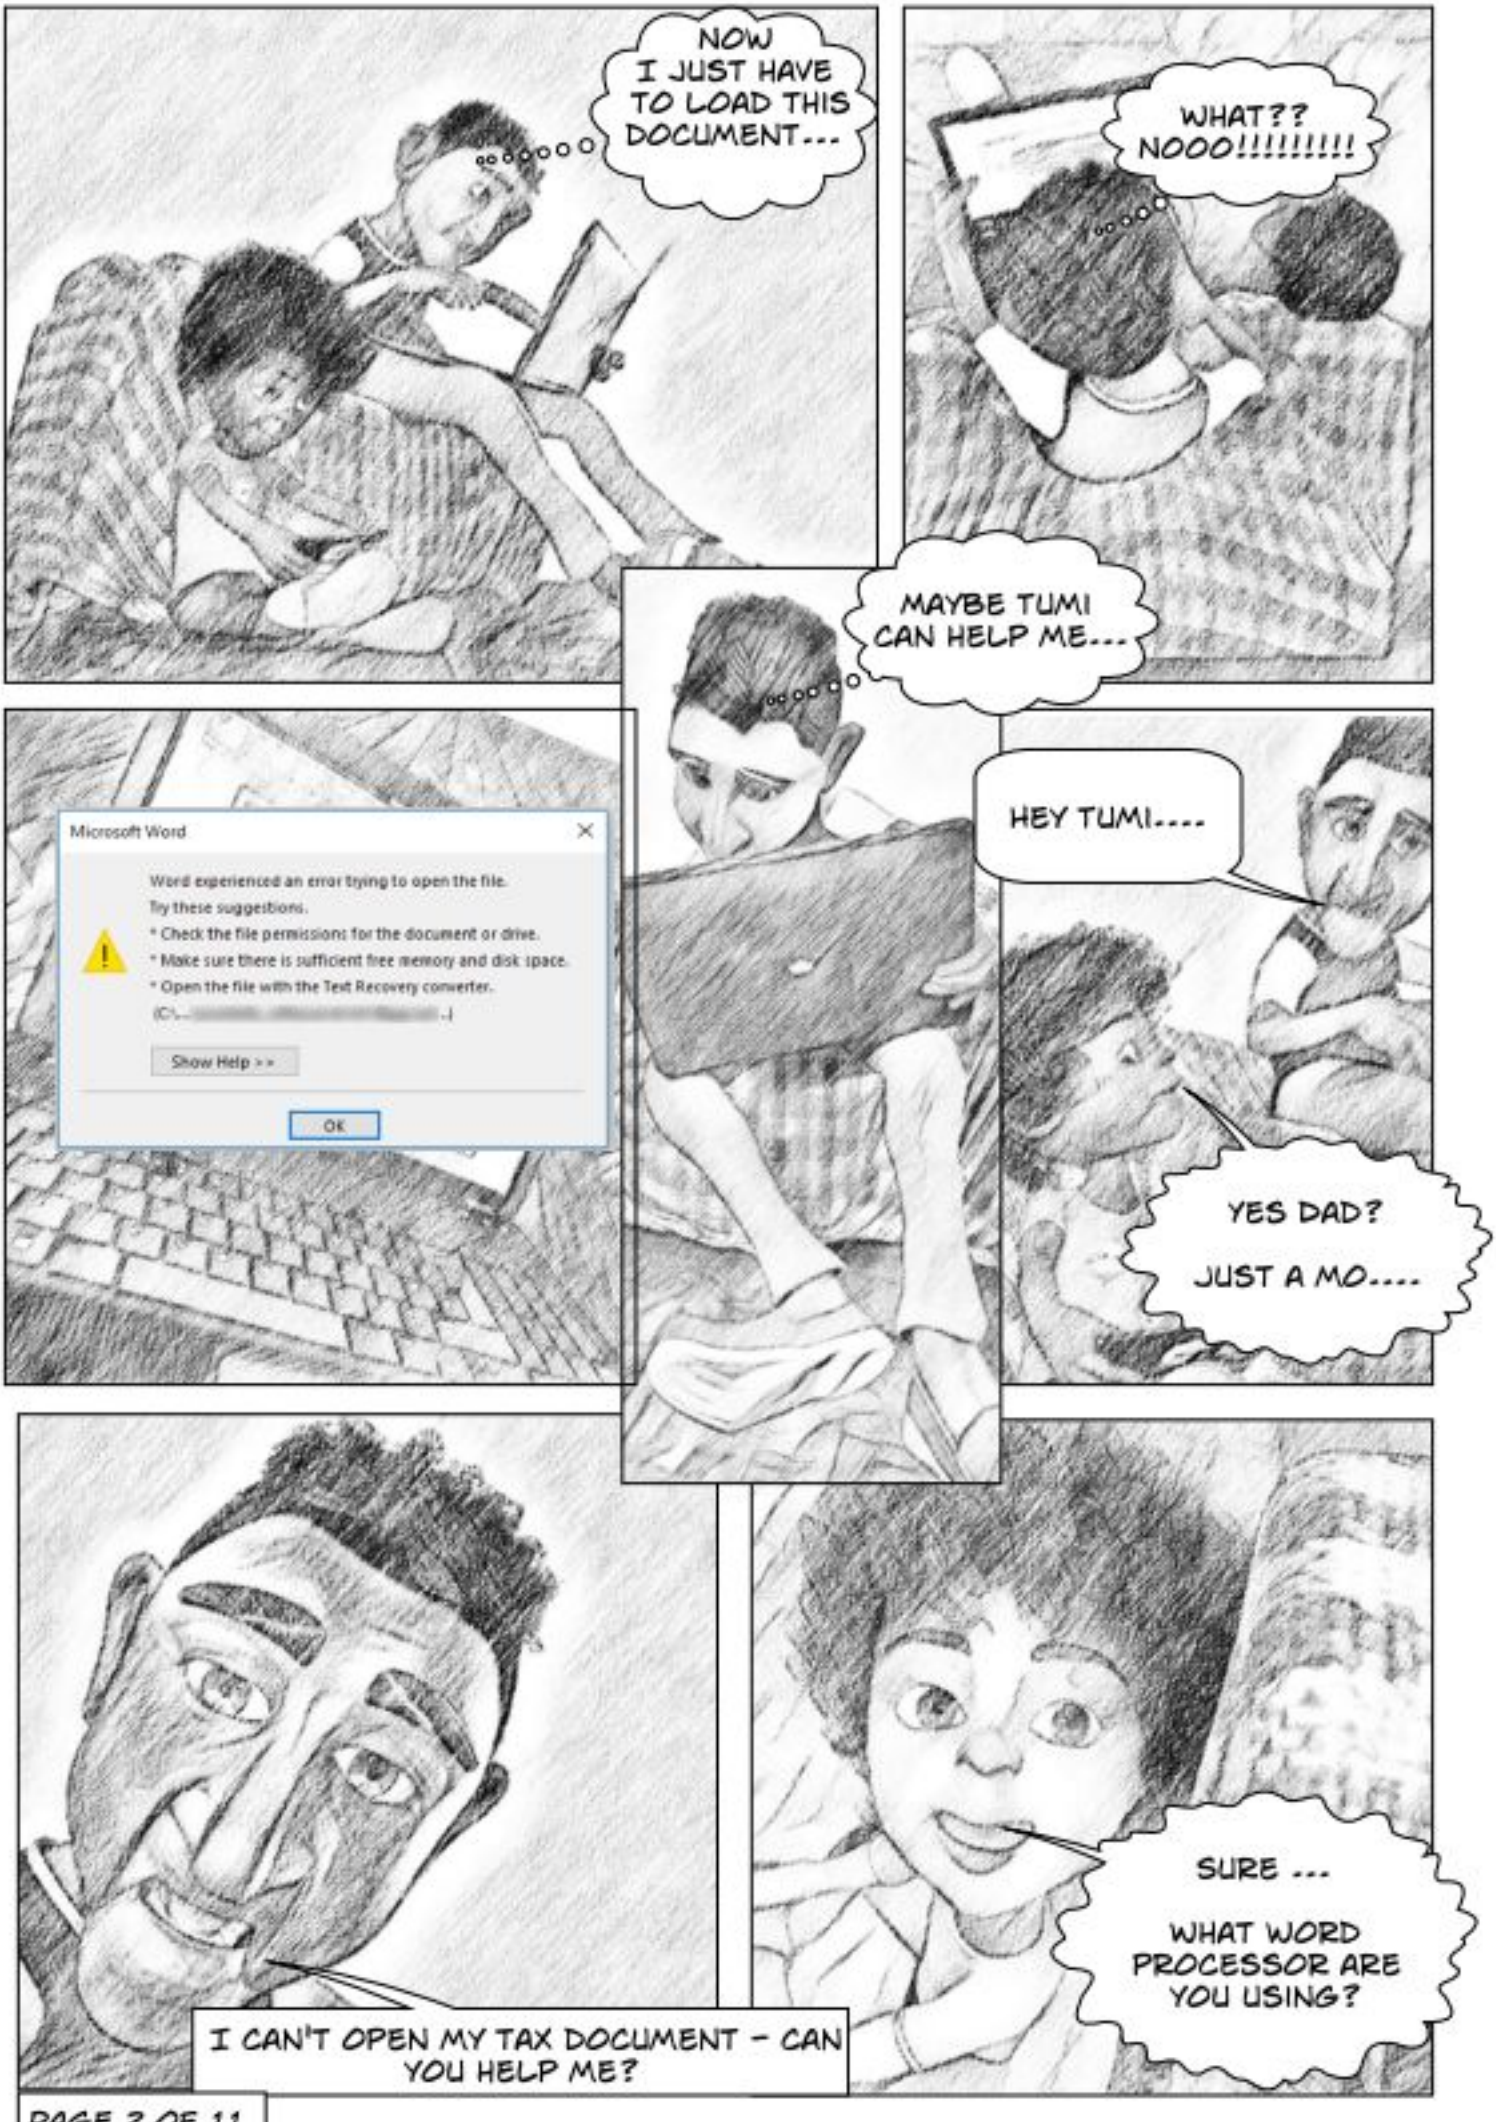
terrific TUMI

AND THE TROUBLED BABA



Knowledge INSIDE



NOW I JUST HAVE TO LOAD THIS DOCUMENT...
WHAT?? NOOO!!!!!!!!!
MAYBE TUMI CAN HELP ME...
Microsoft Word
Word experienced an error trying to open the file.
Try these suggestions.
* Check the file permissions for the document or drive.
* Make sure there is sufficient free memory and disk space.
* Open the file with the Text Recovery converter.
Show Help >>
OK
HEY TUMI....
YES DAD?
JUST A MO....
I CAN'T OPEN MY TAX DOCUMENT - CAN YOU HELP ME?
SURE ...
WHAT WORD PROCESSOR ARE YOU USING?

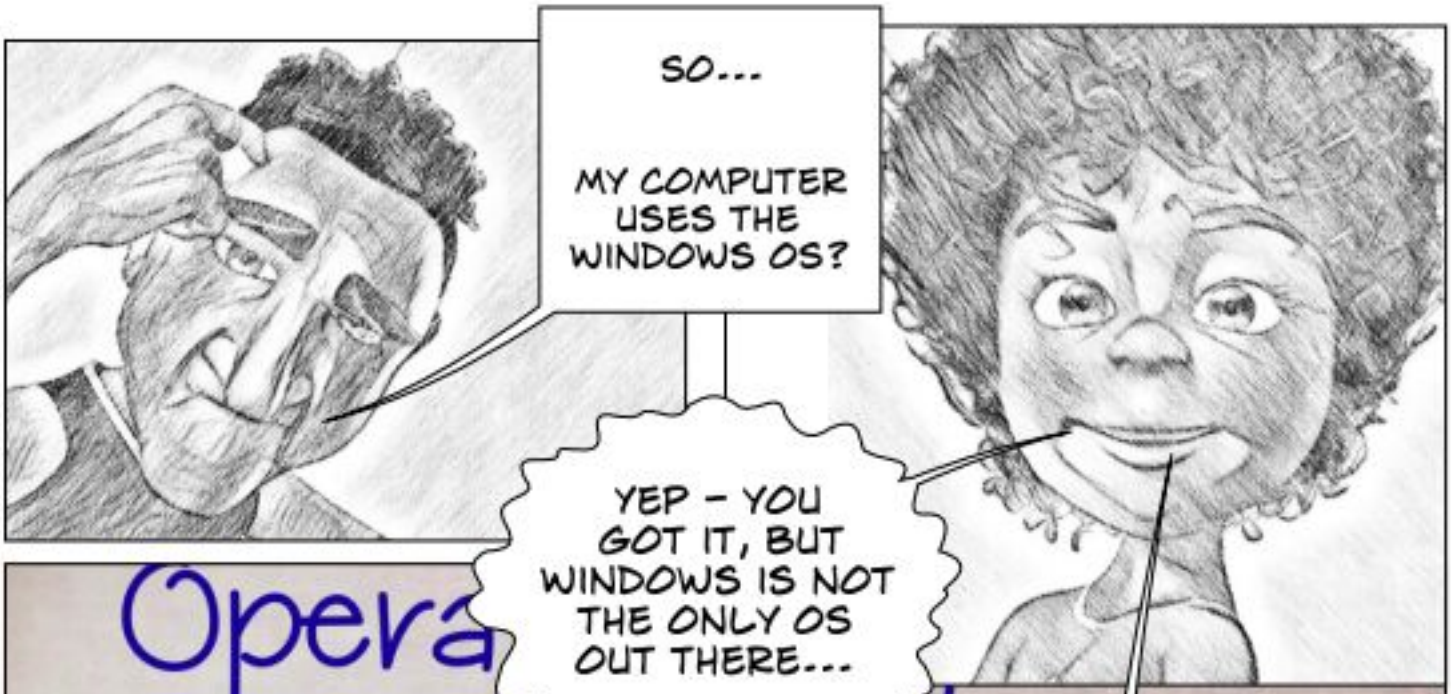
I DUNNO.... LET ME THINK.....
WINDOWS???
DAAAAD!!!!
EISH!!!
WHAT DID I DO WRONG THIS TIME???
MAYBE IT WILL HELP IF I SHOW YOU WHAT WE LEARNT AT SCHOOL?
NGCA!
THAT'S A GREAT IDEA!!

TIME PASSES WHILST TUMI DOES SOME PREP.....

Operating Systems

- Shortened to "OS"
- Runs and manages the way the computer works in the background
- You get different OSs made by different companies for different computers / devices
- Software written to work on one OS **will not** work on another OS!!!

That's a big reason to know what OS you are using - so you don't buy the wrong software!



Opera

Computer examples:

Windows

Made by Microsoft
Used on most PC desktops and laptops

YOU ALSO GET LINUX AND MACOS, BUT ON COMPUTERS WINDOWS IS THE MOST COMMONLY USED OS IN THE WORLD.

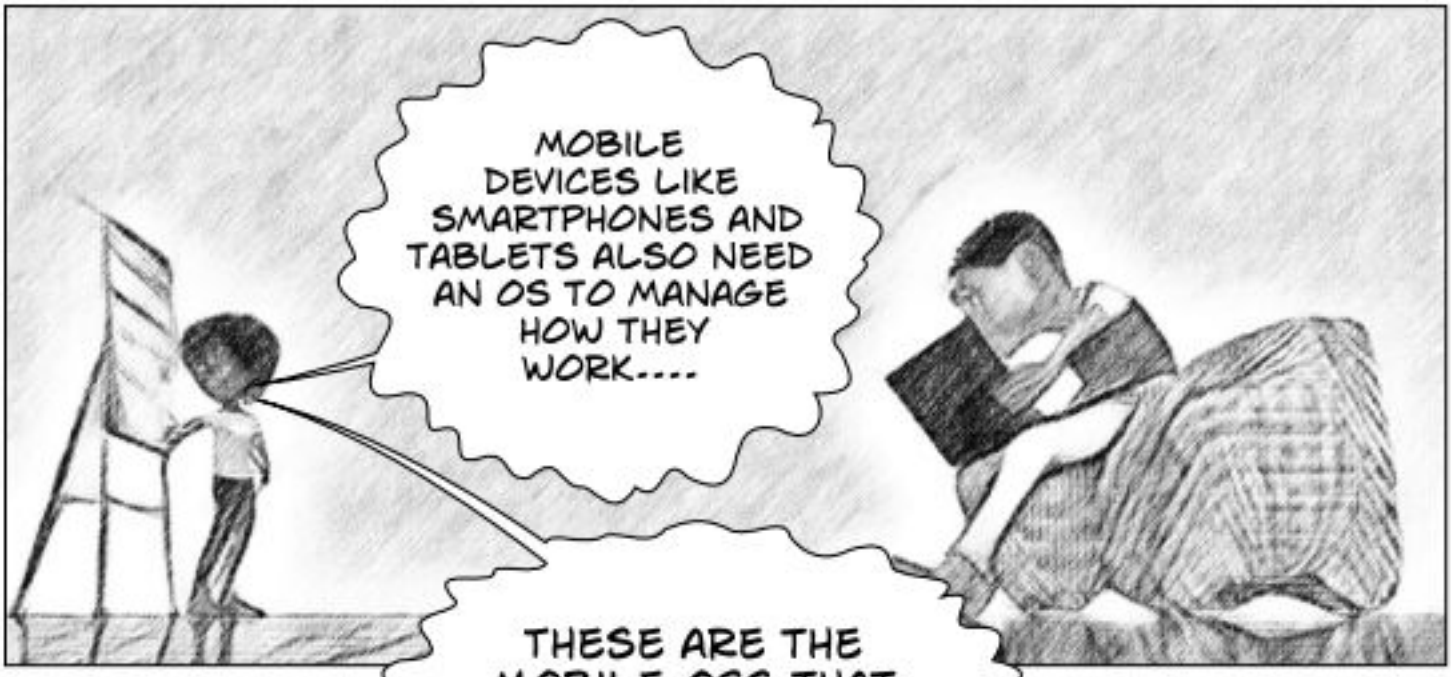
Linux

Free - mostly used in servers but can be a desktop alternative to Windows or macOS

macOS

For Apple computers

MacOS



THESE ARE THE MOBILE OSS THAT YOU GET.

Operating Systems

BECAUSE SO MANY MORE MOBILE DEVICES ARE SOLD THAN DESKTOP AND LAPTOP COMPUTERS...

Mobile examples:

THESE ARE THE MOST USED OSS IN THE WORLD!!

iOS

iOS

For Apple's iPhone and iPadOS for Apple's iPad tablets.

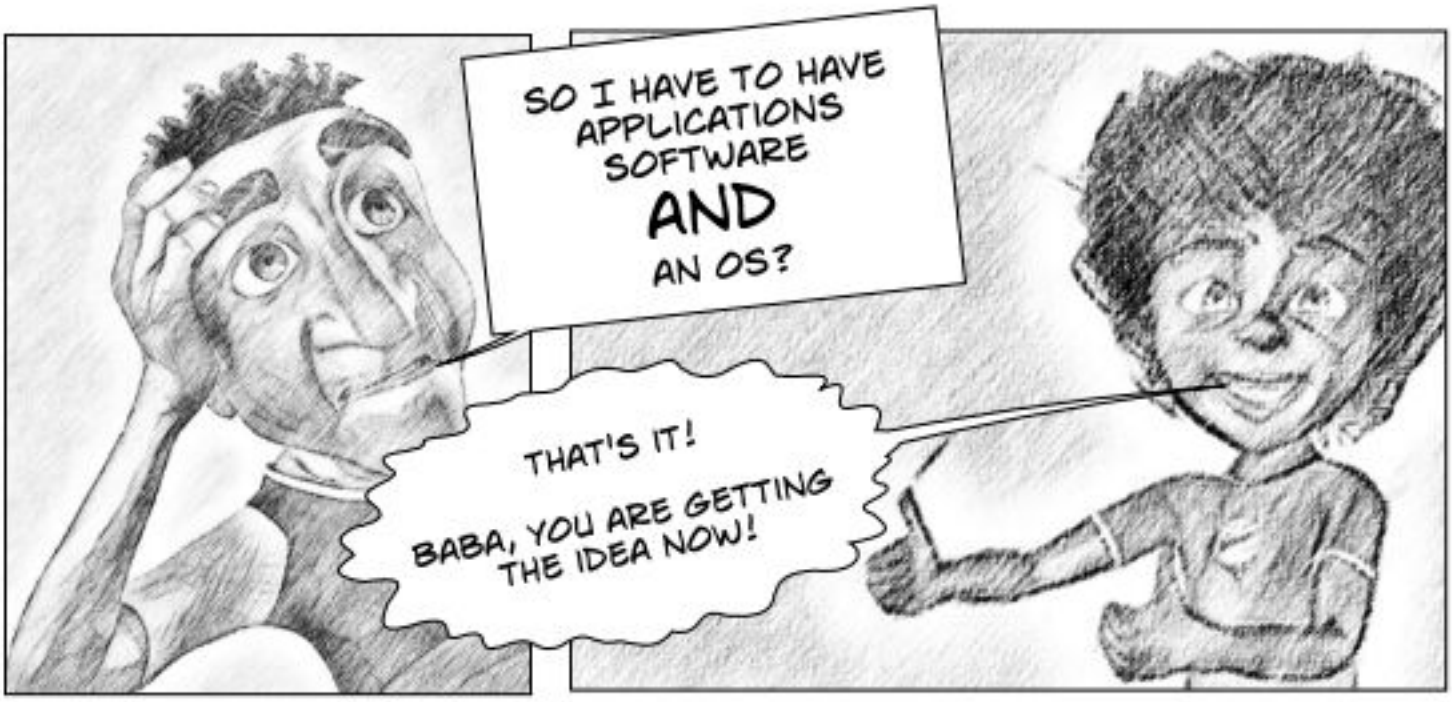
Android

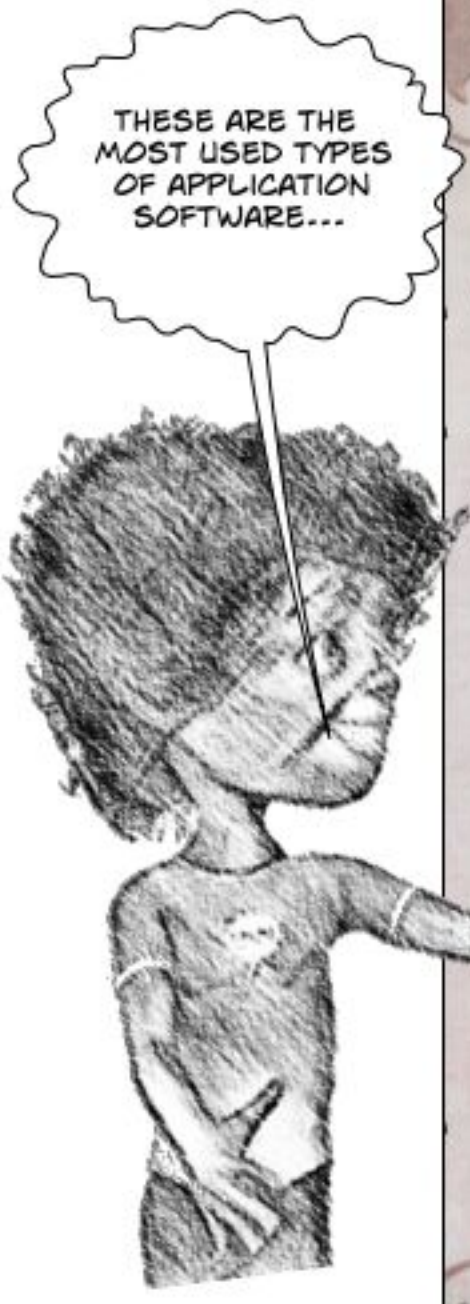
For all other smartphones and tablets

SO ALL I REALLY NEED ON MY COMPUTER IS THE OS?
THE COMPUTER COMES WITH WINDOWS, SO I CAN JUST SWITCH IT ON AND START WORKING,
NO PROBLEM!?
BZZZZT!
WRONG!!
THE OS DOESN'T LET YOU WORK...
IT LETS YOU START THE COMPUTER...
IT ALSO LETS YOU MANAGE FILES - MOVE THEM, COPY, DELETE, ETC.
THE OS LETS YOU INSTALL OTHER SOFTWARE AND MANAGES HOW THAT SOFTWARE WORKS...
THAT OTHER SOFTWARE IS CALLED APPLICATION SOFTWARE - AND IT IS WHAT YOU USE TO GET WORK DONE!

Application Software

- ☑ Lets you get work done!
- ☑ Many different types to do different types of work.
- ☑ Made by many different companies.
- ☑ Written for specific OS - will not work on other OSs!!





"Office" Apps

Used in most work places

Also called "productivity" apps

4 types of apps:

- ☑ Word processor
- ☑ Spreadsheet
- ☑ Presentation
- ☑ Database

Sold together as a 'Suite' e.g.

Microsoft Office

THANKS TUMI!
I THINK I GOT IT NOW:
MY OS IS WINDOWS...
MY WORD PROCESSOR IS MICROSOFT WORD
AND THAT'S ALL THERE IS TO KNOW!!
SORRY BABA.
THERE'S STILL ONE MORE THING YOU SHOULD KNOW....
YOU MEAN THERE'S MORE!!!
????
JUST ONE MORE AND THEN WE ARE DONE -
I PROMISE!
THE OS IS PART OF A GROUP OF PROGRAMS CALLED SYSTEM SOFTWARE!
THIS SOFTWARE CONTROLS, SUPPORTS AND MANAGES THE COMPUTER.

BESIDES THE OS YOU GET ANOTHER TYPE OF SYSTEM SOFTWARE CALLED 'UTILITIES'...

Utility Software

Extra tools for managing your computer

Makes OS tasks easier or adds extra features

Examples include:

- Anti-virus software (to keep your computer safe from malware)
- Backup software

IT IS ESSENTIAL THAT YOU HAVE AT LEAST ANTI-VIRUS SOFTWARE.

THIS HELPS KEEP YOU COMPUTER SAFE FROM THREATS LIKE VIRUSES, WORMS, ETC.

AND THAT'S IT, BABA.

NOW YOU WON'T MIX UP YOUR WORD AND YOUR WINDOWS AGAIN!

THANKS TUMI!

BEST DAUGHTER EVAH!

END!
